

Urine sampling (biological monitoring) for isocyanate exposure measurement Informed consent

A biological monitoring programme is about to begin in your workplace. The results will be used to check that your exposure to isocyanates at work is being adequately controlled.

Informed consent form

Regarding the control of exposure to isocyanates at _____ (premises),
your agreement is needed to provide a sample of urine to a representative of
_____ (service provider/manager), to decide whether
further steps are needed to control your exposure.

Please note:

- The sample will **only** be analysed for isocyanate exposure
- The result will indicate your personal exposure to isocyanates

Section A: To be completed by the employee

1 Do you want to receive your own copy of the results, and be told what it means? YES / NO

If YES, send the result to: _____

(You can show the results to your Trade Union safety representative, if you wish)

2 The result will show whether improvements in control are needed to reduce your exposure.

Please select one of the options below:

- | | |
|--|--------------------------|
| 1. You can send my personal test result and interpretation to my employer. | <input type="checkbox"/> |
| 2. You can send my anonymised result and interpretation to my employer. | <input type="checkbox"/> |
| 3. You may send only the interpretation to my employer. | <input type="checkbox"/> |

Employee's signature _____ Date _____

Section B: To be completed by the biological monitoring programme manager

I agree to abide by the above conditions.

Signature programme manager: _____ Date _____
